Temperature and door-opening recorder with a long-range LoRaWAN ${ }^{\top M}$ connectivity

## Presentation

The LoRa ${ }^{\oplus}$ SPY T1 recorder measures and records temperature and door openings. Data are sent to the JRI secure Cloud by the LoRaWAN ${ }^{\top M}$ network of the telecom operators members of the LoRa Alliance ${ }^{T \mathrm{M}}$, or by a local network. In case of thresholds excursion, realtime alerts are sent.

The LoRa ${ }^{\oplus}$ SPYT1 is particularly adapted to the supply chain applications, transport and warehouse storage areas.
